The Tony Riso Company is a full line repair center for Star, Kavo, Midwest, NSK, Champion, Bien-Air and most other brands of handpieces. Tony Riso Company specializes in keeping your handpieces up and running longer. We can rebuild turbines for only \$89.95 with a full 90-day warranty! Returning your handpiece to the manufacturer may cost you weeks or months without it! The manufacturer's repair charges are very high because their repair involves replacing the turbine and associated parts. Most of the time the turbine does not need replacement, it simply needs new bearings and O-rings. Judicious repair can save you a lot of money and time. We specialize in turbine rebuilds. We expertly replace fiber-optic bundles, all slow-speed handpieces, attachments, contra-angles, latch heads, prophylaxis heads, quick connects, Kavo couplers and we sell new products. We can fix non-working equipment fast and affordably!

At the Tony Riso Company Repair we take pride in our personal service. We put our reputation on the line every time you allow us to help you. Give us a try and you will experience why our customers keep coming back to us time after time.

Put us to the test! Send us one of your handpieces. If you're not 100% satisfied with our service, call and we will make it right.

### **Our Pledge to You**

**Thorough Testing.** All handpieces are thoroughly tested before any repairs begin. We test your handpiece for torque, water leaks, clogged water lines, and excessive noise or vibration, as well as stripped metal chucks.

**We never do unnecessary repairs.** We will advise you if a handpiece is sent to us for repair and needs only a chuck. If a handpiece is tested and found to run and cut well and does not require further repairs, we will not repair it arbitrarily, but rather advise you to check your unit or air pressure source etc.

**Same day service.** Most repairs are done the same day that we receive them, and we ship your repaired handpiece the following business day. Should there be any necessary delay, we will notify you of the situation.

**Quality parts.** We use only the very best quality bearings and parts. We never use inferior quality or surplus bearings in any handpiece.

**Warranty.** Each handpiece is inspected, repaired and tested in accordance with the manufacturer's standards and specifications. We guarantee all materials and workmanship for a full 90-days. During the warranty we will repair or replace, without charge, any defective parts, if such defect results from normal service and is not the result of apparent misuse, abuse or accident.
